The above information applies only to bottled and canned products and not to those served from a fountain dispenser.

\*Carbohydrates

\*\*Acesulfame potassium

†The amount of sugars per 8 fluid ounce (240 mL) is equal to the grams of carbohydrates.

††The amount of sugars (carbohydrates) per 8 fluid ounce (240 mL) is 0 grams. These products are low calorie.

These products are 0 grams total fat and 0 grams protein per 8 fluid ounce serving (240 mL).

Values listed may differ from those declared in the nutrition facts on package labels due to rounding rules required by the Food and Drug Administration. FDA also specifies that nutrition information for packages less than 16 fluid ounces be based on a serving size equal to the net contents of the package rather than 8 fluid ounces.

The sodium value represents the maximum amount of sodium and includes the sodium derived from ingredients plus water. The actual amount of sodium in the beverage may be less depending on the quantity contained in the water supply where the finished beverage is produced. The sodium content of the water used in production will not exceed 25 milligrams per 8 fluid ounces (240 mL).
